### About Level A Commodity Services

Level A Commodities is a global strategy, knowledge management and consulting firm that offers advisory on Agriculture Value Chains, Trade and Investment and International Trade & Analytics to clients worldwide. Tapping into our vast knowledge banks & real-time market intelligence, valuable analytics are made available to stakeholders ensuring an edge in a volatile market environment. Our team of experienced professionals offers expertise in a broad spectrum of agri-markets and industries including Agriculture, Food Processing & other Food Services sectors.

### Our Product Dashboards

- Data Collation

We collate data from all possible sources and authenticate it via remote sensing techniques, field surveys public organizations, trade teams, and other authenticated sources. The information covers crop production, consumption, weather, infrastructure, prices, trade, socio-economic and environmental indicators. The collated data is of varied formats and languages which includes printed datasets, spreadsheets, APIs, PDFs, emails, images, etc. Our disruptive technology cleans, and synthesizes the information and enable the user to have comparative analysis.

- Analytics

We upon collation of data, transform it into interactive Agri Dashboard Model. We are continuously striving and developing new analytical tools, algorithms based upon 50+ years of datasets, price predictive modelling, thereby allowing our users to gauge future insights. Users may plug and play, and may analyse the factor relation as per their fundamentals.

### About Agri Price Dashboards

We have created interactive Agri Price Dashboards, enabling the user to have instant gauge on the movement of prices and the future rise or fall in prices along with bearish and bullish factors responsible for the effect.

The analysis is based upon statistical tools and algorithms developed inhouse, being verified via 50+ years of datasets. The predictive analysis is solely based on algorithms and we have seen maximum error% level up not more than to 2-5%. Also, the note of factors responsible for the movement is listed to provide more accuracy in building the thought process.

The agri price dashboard is self-explanatory and user friendly. User may read and navigate through it. In the graph, user may drag the pan below the graph to analyse the period. User may stretch the pointer in graph to zoom and double click to zoom out.

*Disclaimer: The analysis is only for showcasing the trend movement of agri commodity, the prices are not the tradable price. Level A is not responsible for any trade activity on these prices.*
